## 1810 Series™ Driveshaft Components

Genuine Spicer® Driveshaft Components – There is No Substitute.

When it comes to keeping your vehicle up and running, why take a risk with unproven knock-off replacement parts? Genuine Spicer service parts are the same as the original equipment parts, adhering to rigid manufacturing specifications for performance and reliability. Unlike non-genuine parts, our wide range of Spicer driveshafts provide less drivetrain vibration, improved balance and stiffness, and more lateral protection against environmental contaminants. It all adds up to longer-life parts for maximum operating costs, proving the best replacement part is always the original.

### Nomenclature

This document is intended for nomenclature purposes only and is not to be used for assembly instructions. It does not include every possible assembly or optional item. Parts pictured here for reference only and are not intended to be substituted. Always refer to the parts list and representative of all forms of printing. This text is printed per Original Equipment Manufacturer's requirements.

Warning: Rotating shafts can be dangerous. They can snag clothes, skin, hair, hands, etc. This can cause a serious injury or death. Do not work on a shaft (with or without a guard) when the engine is running.
